Ever wonder why employees quit after less than a year? Or why some new hires come up to speed faster than others? Onboarding is a critical part of a thoughtful talent management strategy, but it is often overlooked as a paperwork process or poorly executed.

More than 80 percent of new employees decide whether or not to stay with a company within the first six months of being hired, and 1 in 4 do leave in the first year. An unorganized or incomplete onboarding process can cause those employees to rethink their decision to join the company just when they should be the most enthusiastic.

When it comes to best-in-class onboarding, 79% of employees received rating of “exceeds expectations” on last performance review leading to 15% yearover-year improvement in revenue per full-time
equivalent. If you’re looking for a new way to improve the bottom line this year, check out our latest innovation: SAP SuccessFactors Onboarding!
